

TAMBARAM CITY POLICE

CERTIFICATE OF APPRECIATION

This is to place on record the sincere appreciation of the Tambaram City Police Commissionerate for the valuable professional services rendered by **M/s. INFOMAPS – Sri Mangadu Kamatchiamman Business Corporation** in the **design, development and deployment of an integrated GIS-based Policing and Public Safety Application** for the Commissionerate.

The application has provided a technology-enabled platform to strengthen field operations, improve situational awareness and support effective policing through the integration of Geographic Information Systems (GIS), mobile technology and real-time field monitoring.

Integrated GIS-Based Policing & Control Room Support

The application enables the Control Room to obtain a real-time geographical view of field operations, including patrolling routes, movement of police personnel and deployment of field teams, facilitating quicker coordination and response to incidents. The integration of various policing and public-safety layers provides a comprehensive operational picture for informed decision-making.

Field Monitoring & Officer Safety

Infomaps has provided effective digital tools for field-level monitoring, including QR-code based attendance, real-time transmission of photographs and vehicle-check details, integration of Beat attendance from the Police App, and an in-built SOS facility for officers in distress. These features contribute to improved accountability, field visibility and officer safety.

Crime & Traffic Information Management

The system facilitates the organisation and geographical visualisation of historical crime information by year and category, enabling crime incidents to be viewed spatially for better analysis and operational planning. Important public locations, ATMs and surveillance cameras have also been mapped. Traffic-related information, including junctions, congestion-prone locations, pedestrian crossings and traffic signals, has been consolidated to support effective traffic management and timely response by the Control Room.

Contribution to Digital Policing

Throughout the development and implementation of the application, Infomaps has demonstrated professionalism, technical expertise, responsiveness and commitment to timely execution. The team has worked closely with the Police Department to translate operational requirements into practical GIS-based digital solutions.

The contribution of Infomaps has supported the digital transformation of policing operations, providing an integrated technology platform for field monitoring, crime analysis, traffic management, officer safety and public-safety operations.

The Tambaram City Police Commissionerate places on record its appreciation for the valuable services rendered by **M/s. INFOMAPS – Sri Mangadu Kamatchiamman Business Corporation** and acknowledges its continued commitment and support towards technology-driven policing, operational efficiency and enhanced public safety.

24/9/26
Commissioner of Police,
Tambaram City Police.
